At **Galaxy Media**, attracting attention is our specialty! We know that consumers have changed the way that they absorb brand messages- and we know what it takes to get their attention. Did you know that 93% of Americans still listen to radio every week? Frequency is key when you're looking to reach consumers- and Galaxy can help!

Galaxy Media is locally owned and operated, and CNY is our home! When you are listening to our stations, you'll hear LIVE voices right from our studios in Armory Square.

We also have a production studio right at our office within Armory Square (with free parking) and a team that can help you put together creative campaigns to ensure you are heard and noticed.
