**Peterson Plumbing**

**Craig Peterson**

Member Since May 2005

In 1995 I started **Peterson Plumbing**. After working for various companies in the community initially as an Apprentice Plumber, then a Journeyman Plumber and finally a Master Plumber I decided to go out on my own. My last employer made the decision for me. We had a disagreement that, to my surprise, left me unemployed! I always wanted to be self employed and figured now was the time. **I remember asking my Father's advice and him telling me just be honest and fair.**

Our first office was in a 10 by 10-foot room in the basement of my Cicero home; the company quickly developed a loyal customer base and a fantastic reputation for excellent customer service. Within a year, we moved into a small commercial building on the north side of Syracuse, not long after we outgrew that location and in 2002 moved into our current 4300 square foot location in Liverpool. **We are now in our 28<sup>th</sup> year of providing quality plumbing service to the Greater Central New York area.**

**Quality work backed by honest business principles and integrity** best describes the business model of **Peterson Plumbing**. We serve Onondaga County, and work in Oswego, Oneida, Madison, and Cortland County as well. You may see trucks working hard as far north as Watertown and East in Utica. No distance is too great to ensure quality plumbing service to Central New York. We are locally owned and operated; we are not a franchise, nor a company owned by some conglomerate. If you need plumbing or sewer and drain cleaning service, give us a call.

When plumbing needs arise at your home or business, it is hard to find a service provider you can trust to get the job done and done right.
